

How to care for your hardwood flooring.

Do's: You may sweep or vacuum regularly to remove dirt and grit. Do not use a beater bar brush when vacuuming. Dry mop with a reputable hardwood surface cleaner. Place walk-off mats at entrance to trap dirt and moisture. Use felt pads under furniture legs to avoid scratches. Clean spills with a soft cloth when they happen. Use ice to harden chewing gum and gently scrape with an old credit card.

Dont's: Do not use wet mops or steam mops. Don't use harsh chemicals, ammonia, or abrasive cleaners. Don't use oil-based wax or polish on your hardwood. Don't drag heavy furniture across the floor. Don't let pet nails grow too long. Don't add moisture to post-construction sheetrock dust, always vacuum first!
